European
Global Navigation
Satellite Systems
Agency

1. GSA AND THE GALILEO SECURITY MONITORING CENTRE

The European GNSS Agency (GSA) is responsible for the operations and service provision for the European Global Navigation Satellite Systems (GNSS) EGNOS and Galileo. By developing a new generation of GNSS, Europe is laying the foundation for new high-technology industry development, leading to job creation and economic growth. These European flagship space programmes, which embody what can be achieved when Europe works together, are already bringing real benefits to people and business in Europe and around the world.

For more information on the GSA and the European satellite navigation programmes, click [here](#).

GALILEO

Galileo is Europe's Global Satellite Navigation System, providing improved positioning and timing information with significant positive implications for many European services and users. The Galileo system, once fully operational, will offer four high-performance services worldwide:

- Open Service (OS): Galileo open and free of charge service set up for positioning and timing services
- Commercial Service (CS): A service complementing the OS by providing an additional navigation signal and added-value services in a different frequency band
- Public Regulated Service (PRS): Service restricted to government-authorized users, for sensitive applications that require a high level of service continuity
- Search and Rescue Service (SAR): Europe's contribution to COSPAS-SARSAT, an international satellite-based search and rescue distress alert detection system

Galileo Security Monitoring Centre (GSMC)

The GSMC is an operational centre of the GSA. It contributes to the fulfilment of the GSA mission by ensuring that sensitive information relating to the use of Public Regulated Services (PRS) is suitably managed and protected and not exposed to Galileo Control Centres. The GSMC will also allow the GSA to continuously monitor the security-related status and performance of the elements of EGNOS and Galileo and of the operation of the PRS.

The GSMC is an integral part of the Galileo infrastructure. It undertakes the following tasks:

- **Galileo security and system status monitoring:** monitoring and taking action regarding security threats, security alerts and operational status regarding systems components
- **Management of PRS access:** the GSMC shall be an interface with governmental entities (through computerised 'Point of Contact Platforms': POCs) for request of cryptographic keys and with Galileo core components to manage the content of security messages broadcast by Galileo satellites
- **Support to the European External Action Service (EEAS) in the field of the Implementation of Council Decision 496:** support in an event of threat to the security of the European Union or of a Member State arising from the deployment, operation or use of the European Global Navigation Satellite System
- **Provide PRS and Galileo security expertise** and analyses on request

The GSMC is currently composed of three teams working under the leadership of the Head of GSMC:

- The operational team whose primary missions are to perform continuous 24/7 security monitoring operations and to provide PRS access, next to contributing to other GSMC tasks

- The engineering team in charge of preparing, developing, and validating the infrastructure and operational activities that are necessary to deploy the GSMC future evolutions
- The technical team whose primary tasks are the technical operations support (site hosting and ICT means necessary for the core missions of the GSMC) and the local security operations support (EU classified information present on the GSMC site and its assets), in coordination with the GSA Security Department

Location:

GSMC building facilities and Galileo related information technology equipment are located on two sites:

GSMC Master site: located in Saint-Germain-en-Laye, France. The GSMC has a dedicated building and area within the military base of “Camps des Loges”. The GSMC FR is the main site of the GSMC Operations.

GSMC Backup Site: This new site is based at INTA, campus La Marañosa, 25 km Southeast from Madrid, Spain, near the town of San Martín de la Vega, following Commission Implementing Decision (EU) 2018/115 and is expected to be able to operate as a back-up centre for the main site by the end of March 2019.

2. TASKS AND RESPONSIBILITIES

The GSMC Operator will be responsible to:

- Ensure Galileo system and security status monitoring, by taking action against security threats and security alerts
- Ensure the provision of PRS access service to the Competent PRS Authorities (CPA) in Member States as part of the overall Galileo PRS provision
- Implement Council Decision 496 ("Joint Action") instructions, in the event of a threat to the security of the European Union or of a Member State arising from the deployment, operation or use of the European Global Navigation Satellite System

The GSMC Operator will have the following non-exhaustive list of tasks and responsibilities:

- Supervision of the security and system status of the Galileo system using dedicated GSMC security tools
- Incident handling of any security alerts raised by the GSMC security tools in line with the GSMC operational procedures
- Operating the GSMC Ticketing System to log and trace the full incident handling process
- Participating to the review and refinement of the incident handling processes in order to optimise GSMC incident response capabilities
- Maintaining the lessons learnt knowledge base following incidents closure
- Contributing to the operations and maintenance of the GSMC Vulnerability Management, where Galileo software vulnerabilities are analysed in terms of security impact
- Contributing to the development of the information security vision for Galileo system evolutions
- Supporting the level 1 maintenance (at basic level) of the Galileo Security Facility (GSF) system
- Supporting the improvement of the GSMC Security Monitoring and PRS access operations in terms of operational procedures development and GSF equipment validation for the new releases of operational equipment

- Ensuring the timely execution of Member States PRS requests and orders
- Ensuring that authorised users are able to access and use PRS in accordance with their needs
- Supervising the PRS status of the Galileo system using dedicated GSMC security tools
- Providing advice to Member States CPAs on the operation of the PRS, including providing advice on how to achieve their goals or in escalating requests to the GSMC analysis team
- Investigating PRS anomalies reported by CPAs according to procedures and their resolution to ensure PRS delivery
- Investigating any degradation of the PRS identified either by the Galileo System or external stakeholders
- Ensuring that the GSMC Service Desk functions are delivered
- Supporting the ramping-up of the GSMC PRS operations in terms of operational procedures development and GSF equipment validation for the new releases of operational equipment
- During times of crisis, providing advice to EU decision-making bodies on the continuity of the PRS, proposing actions required to maintain the service, supporting Galileo Crisis Management and implementing the instructions issued by the relevant authorities

Prior to certification and shift operations, the role will be primarily a normal 'day-time' job contributing to the development of GSMC operations.

Besides the formal internal certification training, the job holder will participate to industry recognised external training in order to acquire or maintain the technical competencies required for this position.

Indicative date for the interview and written test¹⁰:

April/May 2019

Candidates are strictly forbidden to make any contact with the Selection Board members, either directly or indirectly. Any infringement of this rule will lead to disqualification from the selection procedure.
