

Clarification Note #14

(non-Proprietary Information)

GSA internal reference: 251998

Procurement procedure: GSA/OP/09/18

High Accuracy Data Generator (HADG)

Question #58: Section 1.1.1 of the Tender Specifications provides the context of the tender and mentions the High Accuracy Service, together with the Commercial Authentication Service, as one of the additional worldwide services offered by Galileo. For avoidance of any ambiguity, the GSA is requested to confirm that the capability of providing Commercial Authentication Service is not part of the present HADG procurement procedure and hence will not be accounted in the tender evaluation.

Answer #58: GSA confirms that the Commercial Authentication Service is not part of the present HADG procurement procedure and that section 1.1.1 describes the context of the tender on what regards to the Galileo Programme including references to the Services to be provided by Galileo.

With regards to the scope of the HADG procurement the bidders are invited to check:

- Section 1.4 of the tender specification providing a clear description of the purpose and scope of the HADG contract;
- Section 1.2 "Scope of the work" of the corresponding Statement of Work (GSA-GAL-SE-SOW-241535);
- The document GSA-GAL-SE-REQ-241234 (Galileo High Accuracy Data Generator Technical Requirements), in particular, section 1.1 "Scope";

and to interpret the tender specifications in their entirety.
